General Appearance: Well-balanced, strong, muscular, agile, over-active, already gives indication of speed and endurance, not massive by any stretch of the imagination, and on the small side, the ridge is good, and long.

Behaviour/Temperament: Dignified, very intelligent, not aloof enough, very forward and affectionate, too direct in approach to other dogs where he pushes his luck before putting in a healthy safety distance.

Head: Very good head all round, slightly big for body, with powerful jaws. The muzzle is dark and the eyes are just off dark. The ears set-off the head well and the neck is of good length.

Body: Muscular, narrow waisted, good tuck, deep chest but not enough fore-chest, good tail, not enough curve on the croup.

Limbs: the limbs, and feet, are very good.

Gait/movement: Very happy, lively mover.

Coat: Good density.

Colour: Strong red colour with black muzzle, good consistent colour throughout with little white.

Height: 63 cm.

Weight: 35 kg.

Notes: At this stage, 15 months old, he has the maximum effective number of 4 CC's, one BOB, and 4 RBOB's but his happy affectionate disposition may count against him as it accentuates his immaturity. A lot of his character traits are credited to his one quarter Zimbabwean antecedence. Very happy running in the veld using his nose and eyes equally well. In the dense grass he has no problem returning from 200m out to unseen handler.
